CELEBRATING 10 YEARS OF CHRISTIAN EDUCATION IN GHANA

Stop for a moment and imagine the impact of knowing that daily we will touch the hearts and minds of some 900 children. Truly, our school has become one of our greatest home mission fields. Therefore, we must continue to strive not only for excellence in regular education but also in the art of true Biblical discipleship.

The most exciting memory of 2010 has been the number of children who have trusted in the Lord Jesus Christ as Savior: 37 children from our elementary school and 14 from the junior high school. Most of these children came to the Lord after the Wednesday morning chapel messages.

This past year has also been filled with achievements and blessings. In September we opened and dedicated our new computer lab with over 170 parents present to hear the gospel message from our pastor. We have the largest school computer lab in our city with 30 functioning computers. We have also been able to start building another two story building on our Techiman campus which will house four 28' x 28' classrooms. We are

building this new building so that we can move our Junior High school from the Krobo campus to the Techiman campus to make room for the Hope Int. Senior High School. Because of this relocation, we are in the process of remodeling our school kitchen and enlarging our restroom facilities on the Techiman campus. Please pray for these pressing financial needs (\$6,000).

Dear brethren, pray that God would send us a music teacher to train our children in praise. Our earnest prayer is to be about the business of molding minds and winning souls for Eternity!

The School Manager - *Mr. Edward M. Danyagre*
